Call for Tenders for the development, hosting and maintenance of the SAFIRE v6 web-based application

The European Organisation for the Safety of Air Navigation (EUROCONTROL) was founded in 1960 by six States. It now has 41 Member States. EUROCONTROL's mission is to harmonise and integrate air navigation services in Europe, aiming at the creation of a uniform air traffic management (ATM) system for civil and military Users, in order to achieve the safe, secure, orderly, expeditious and economic flow of traffic throughout Europe, while minimising adverse environmental impact.

For more general information on EUROCONTROL, please visit www.eurocontrol.int.

SAFIRE (Spectrum and Frequency Information Resource) is the web-based application, developed 10 years ago by EUROCONTROL in cooperation with ICAO FMG, to assist with aeronautical frequencies coordination and registration in the European Region. SAFIRE provides a database containing information about all aeronautical Frequency Assignments in the communication and navigation frequency bands and implements a set of collaborative functions which ensure all States can accept or reject all proposals for new Frequency Assignments before they are registered.

EUROCONTROL launched the operation of SAFIRE in 2006, and it is still the same application that is used today, based on the requirements and specifications developed prior to 2006. SAFIRE requires now significant improvements which justify its re-development.

Therefore this Call for Tenders addresses the development of a new SAFIRE web-based application (referred to as **SAFIRE v6**) as well as its hosting and its maintenance.

Information session (if sufficient number of potential tenderers): Friday June 15th 2018 from 10.00am to 1.00pm (Brussels, Belgium time). Registration required.

Closing date: Monday September 3rd 2018 at 3.00 pm (Brussels, Belgium time)
