Call for Tenders for the tasking support related to the AMC Operator tasks.

The European Organisation for the Safety of Air Navigation (EUROCONTROL) was founded in 1960 by six States. It now has 41 Member States. EUROCONTROL's mission is to harmonise and integrate air navigation services in Europe, aiming at the creation of a uniform air traffic management (ATM) system for civil and military Users, in order to achieve the safe, secure, orderly, expeditious and economic flow of traffic throughout Europe, while minimising adverse environmental impact.

For more general information on EUROCONTROL, please visit www.eurocontrol.int.

ATS Messaging Management Centre (AMC)

The ATS Messaging Management Centre (AMC) was developed and implemented by EUROCONTROL upon a request from the ICAO European Air Navigation Planning Group (EANPG). Since 2001, AMC has been providing off-line AFTN/CIDIN/AMHS network management service to 45 States in the EUR/NAT Regions.

Currently the overall management of development, implementation and operation of the AMC service are carried out by EUROCONTROL in accordance with the ICAO ATS Messaging Management Manual and official letters exchanged between the Director General of EUROCONTROL and the Regional Director of the ICAO EUR/NAT office. EUROCONTROL is responsible for the development, implementation and operation of the service. While the development and implementation are contracted to European Industry, the operation is outsourced to the ANSPs of EUROCONTROL member states.

In November 2017, the Network Management Board (NMB/20) provided a positive opinion to the European Commission on the AMC/EDS service, indicating that this service should be delivered centrally by NM. NMB also indicated that the NF IR should be amended to include AMC/EDS Service, after the related business case is approved by the NMB.

Therefore, the objective of the present Call for Tenders is the procurement of the AMC Operator tasks.
