No. 19-110206-A

Call for Tenders with the aim to provide support to SWIM Compliance of NM B2B Services under SDM project C15_319_AF5 SWIM Common Components.

The European Organisation for the Safety of Air Navigation (EUROCONTROL) was founded in 1960 by six States. It now has 41 Member States. EUROCONTROL's mission is to harmonise and integrate air navigation services in Europe, aiming at the creation of a uniform air traffic management (ATM) system for civil and military Users, in order to achieve the safe, secure, orderly, expeditious and economic flow of traffic throughout Europe, while minimising adverse environmental impact.

The Network Manager (NM) carries out air traffic management network functions for the European Commission, on behalf of EUROCONTROL, which was nominated for this task. Working with its stakeholders, the Network Manager develops and runs the European ATM network (covering 43 countries), with the aim of meeting the Single European Sky's performance targets.

EUROCONTROL is a key member of the Single European Sky ATM Research (SESAR) program, which has defined the System Wide Information Management (SWIM) concept. SWIM "consists of standards, infrastructure and governance enabling the management of ATM information and its exchange between qualified parties via interoperable services".

The general objectives for this call for tender are:

- to produce the required evidence for SWIM compliance of the NM B2B services with the PCP ISWIM requirements
- that all the NM B2B services achieve the status "SWIM compliant"
- that the production of the SWIM compliance evidence is integrated into the NM service development process
